Results summary for Nörm N Nörmman:	2
Interpretation and Summary	2

Appendix	4
-----------------	----------

Assessment information

The BFI consists of 25 personality items and 3 demographics (gender, education, and age). Responses to the 25 personality items determine an individual's standing along 5 personality dimensions:

- **Extraversion** – an orientation of interest and energies ranging from the outer world of people and things to the inner world of subjective experience
- **Conscientiousness** – a tendency to be organized, responsible, and hardworking/industrious
- **Agreeableness** – tendency to act in a cooperative, unselfish manner
- **Openness to experience (Openness)** – tendency to be open to new aesthetic, cultural, or intellectual experiences
- **Neuroticism** – chronic levels of emotional instability and proneness to psychological distress

Results summary for Nörm N Nörmman:

There were 0 missing responses across 25 personality item administrations.

When compared against responses of 2799 other individuals, Nörm N Nörmman's personality profile can be extracted from Figure 1 and Figure 2.

Interpretation and Summary

Scores above 100 indicate greater than average whereas scores below 100 indicate less than average.

Nörm N Nörmman scored below average on Agreeableness, below average on Conscientiousness, below average on Extraversion, below average on Neuroticism, and average on Openness.

Appendix

Reported scores should be interpreted relative to an average of 100 and standard deviation of 15. These values are extracted from a normative comparison group of 2799 men and women between the ages of 3 and 86 (average age = 28.77, standard deviation = 11.12, see Figure 3).

The raw score values for the 2799 individuals can be found in Table 1.

Table 1

	mean	sd
Agreeableness	4.65	0.90
Conscientiousness	4.27	0.95
Extraversion	4.15	1.06
Neuroticism	3.16	1.20
Openness	4.59	0.81
